
The application
One Python codebase · one Docker image
Web app
Next.js
What the user sees
requests
Web server
FastAPI
Serves the web app and streams answers
Background worker
Procrastinate
Syncs every 5 minutes, runs AI jobs, sends reminders
reads, saves
Database
PostgreSQL 17 + pgvector
Tasks, people, meetings, emails
Search index: meaning and keyword
Queue of background jobs
Each user sees only their own data
Gmail, Calendar
Google APIs, read-only
Where emails and events come from
emails, events
BRING DATA IN
Google connectors
connectors
Reads Gmail and Calendar
Account access
connections
Google permissions, stored encrypted
Sync
ingestion
Tracks what is new, retries failures
UNDERSTAND IT
Email processing
communication
Cleans, filters and summarizes
Meetings
meetings
Audio, transcripts, speakers
AI
AI gateway
intelligence
Picks the model, enforces the budget, logs cost
AI requests
Google Gemini
AI models
Reached only through the AI gateway
REMEMBER IT
Tasks and decisions
work
Each linked to the email or meeting behind it
People
people
People and organizations
Projects
projects
Groups related work
USE IT
Search
retrieval
Finds the right context for a question
Chat
chat
Answers questions and checks the answers
Reminders
attention
Priorities, reminders, daily briefing
alerts
Browser notifications
Web Push
Reminder alerts, with no content inside
Google sign-in
OpenID Connect
Verifies the user
identity
KEEP IT SAFE
Sign-in
identity
Google sign-in and sessions
Privacy
privacy
Audit log, data export, deletion
Platform
platform
Database access, jobs, file storage
recordings
File storage
Local disk
Meeting recordings
